

FUNDING & POLITICAL ACTION (FPA)

Some things we might do

1. Establish working relationship with APS lobbying group in Washington headed by Mike Lubell.
2. Determine users in each state that represented on House, Energy and Water Appropriations SubCommittee and approach to visit their Representative. Correlate with APS and annual Science-Engineering-Technology Congressional Visits Day (typically 2 days in May).
3. Same for corresponding Senate SubCommittee.
4. Contact JLAB for BNL gaps in 2. and 3.
5. Determine funding bill schedule and schedule letter writing campaigns for various APS meetings.
